OBJECTIVE

To work as an Automation Test Engineer who is well-versed in automation frameworks like Selenium WebDriver using Java. Also, having hands-on experience in developing efficient automation frameworks. Good knowledge of SDLC, STLC, and Agile methodologies, along with collaboration skills using Git. Passionate about delivering quality software through efficient automation frameworks.

TECHNICAL SKILLS

Automation Tools: Selenium WebDriver, TestNG.
Framework Concepts: Page Object Model (POM), Data-Driven Testing, Cross-Browser Testing.
Programming: Java (Fundamentals, OOP, Collections, Exception Handling, Multithreading Basics).
Testing Concepts: SDLC, STLC, Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Defect Reporting.
Web Automation Skills: XPath, CSS Selectors, Web-Driver Wait, Assertions.
Build & Version Control: Maven, Git, GitHub, IntelliJ IDEA.
Database: MySQL (SQL Queries, CRUD Operations, Joins).

PROJECTS (*Git-hub: https://github.com/SriSabari05*)

E-Store Automation Framework

Java | Selenium WebDriver | TestNG | Maven

- Designed an efficient automation framework using Page Object Model for better maintainability of the code.
- Automated customer scenarios like authentication, product selection, update of the cart, and verification of purchase.
- Implemented efficient synchronization techniques for better execution of the scripts.
- Executed regression tests using automation scripts, resulting in significant reduction of manual execution.

Demo-QA Web Automation Framework

Java | Selenium WebDriver | TestNG | Maven

- Developed an automated testing solution that incorporates Forms, Alerts, Frames, Widgets, and Web Tables. Successfully performed complex browser operations involving iframes, alerts, window handling, and drag and drop.
- Utilized efficient locators to identify elements on the web page.
- Ensured test execution reliability by using explicit waits.
- Successfully managed dependencies using Maven and version control using Git.

EXPERIENCE

Technical & Aptitude Trainer

Terv Pro – Chennai

- Trained 250+ engineering students in Java programming concepts, resulting in better logical thinking and analytical skills.
- Organized training sessions on debugging techniques that resulted in 30% improvement in efficiency in identifying errors using structured approaches.
- Designed coding exercises that simulate real-world application validation scenarios.

EDUCATION

Paavai Engineering College Tamil Nadu, India
Bachelor of Electronics and Communication Engineering, ***CGPA: 8.63***

- Active Student Chapter member of Talent Quest for India, IETE, IEI, and GDSC, NSS.
- Authored articles on recent technologies and proposed in international conference.
- ***Headship:*** Part of TQI Team, Project management Lead.
